-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Election/Restrictions

Claims 15-20 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 2/22/2006.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Cantell et al. Cantell et al teaches a system (50) which can be employed for the forming of a silicide on a silicon material including a plurality of vacuum chambers (10, 30 for example) with a vacuum transfer means between chambers (see col. 4 lines 48-55 for example), a heater chuck (16, 14) for holding a substrate to be treated where the chuck is heated resistively, and where the separate vacuum chambers contain metal formation tools (sputtering in chamber 30 for example), annealing (which requires a heating tool) in a separate chamber of the device (50) with a second heating tool (see col. 5 lines 58-65 for example), and an etching or cleaning device in another vacuum chamber (10) thereby showing all aspects of the above claims since the system of Cantell et al could perform the recited functions of the instantly claimed apparatus (treatment of specific materials at specific temperatures) and it has been well settled that where a prior art apparatus can perform the functions of a claimed apparatus, the manner or method of use of an

apparatus cannot be relied upon to fairly further limit claims to the apparatus itself. See MPEP 2114.

Claims 1, 3-8 and 12-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Hirose et al. Hirose et al teaches a system (figure 1) which could be employed for the forming of a silicide on a silicon material including a plurality of vacuum chambers (2 and 4) with a vacuum transfer means between chambers (5), where the separate vacuum chambers contain metal formation tools (3), and a heating tool (6) in separate chambers of the device thereby showing all aspects of the above claims since the system of Hirose et al could perform the recited functions of the instantly claimed apparatus (treatment of specific materials at specific temperatures) and it has been well settled that where a prior art apparatus can perform the functions of a claimed apparatus, the manner or method of use of an apparatus cannot be relied upon to fairly further limit claims to the apparatus itself. See MPEP 2114.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Scott Kastler whose telephone number is (571) 272-1243. The examiner can normally be reached on Monday through Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Roy King can be reached on (571) 272-1244. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
